

# Hello Man Balloon

[www.poltent.pl](http://www.poltent.pl)

## ASSEMBLY KIT

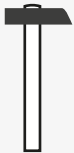

x 1

built-in ventilator

x 4

straight pin  
with eyelet

x 1

assembly  
hammer

x 1

spare hand

## ASSEMBLY INSTRUCTIONS

- 1 Open the zipper on the bag. The zipper divides the bag into two parts, the base with a built-in ventilator and a Hello Man cover.
- 2 Lift the flap fastened with hook and loop and pull out the power cord.
- 3 Plug in the ventilator and wait for Hello Man to take shape.
- 4 At the end, the inflated balloon should be stabilized. Attach the straight pins at the base of the balloon to the ground using a mounting hammer. If the ground is hard and pins installation is not possible, use optional metal weight plates.

## DISASSEMBLY INSTRUCTIONS

- 1 Turn off the power and hold the cover in your hand to keep it clean.
- 2 Wait a moment for the air to escape, roll the cover up and close the cover zipper.
- 3 Insert the power cord inside and remove the pins.

## HAND REPLACEMENT

- 1 On a clean and dry surface, lay the Hello Man cover flat.
- 2 Unfasten the zipper on the hand and replace it with a new one.

## HAND MOVEMENT ADJUSTMENT

### HAND IN MOTION

To make the balloon swing its hand actively, slide the zipper on Hello Man's forearm to the desired effect.

### HAND MOTIONLESS

To keep the balloon's hand still, fasten the zipper on Hello Man's hand.
